# About Us

- G.S.Hospital was established by late Dr. G.Subash,M.B.B.S.,M.D.,2 decades back as a general hospital.
- In 2009 under Dr. Aravinth Reddy's professional and administrative leadership, the hospital has grown to achieve the status of a multispecialty hospital.
- We utilizes sophisticated technology for diagnosis and therapeutic purpose manned by specialist doctors and trained technicians.

# Our Mission

Why we are here

To Feel

To Heal

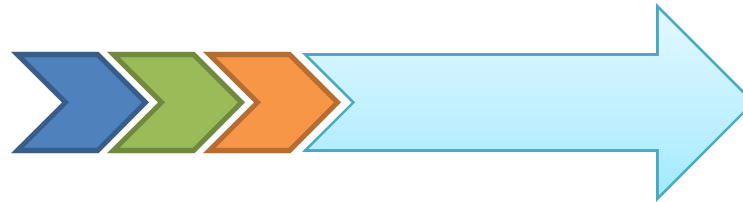

To  
Discover

# Vision

Where we are going

- To be the regional destination provider of innovative and complex patient care
- To pursue breakthrough medical advancements and practices to deliver superior clinical outcomes.
- To provide every patient an experience customized to their medical, emotional, social, and spiritual needs.

# Our Values – We Believe In

We have a continuous thirst for excellence and are always seeking ways to improve the health of those who count on us.

Excellence

We work collaboratively as an integrated team to improve patient care and performance.

Teamwork

We have genuine concern for those in our community and treat them with respect and empathy

Compassion

Integrity

We have a shared commitment to do what is right.

Diversity

We embrace diversity in people, thought, experiences and perspectives.

# Services

What we offer

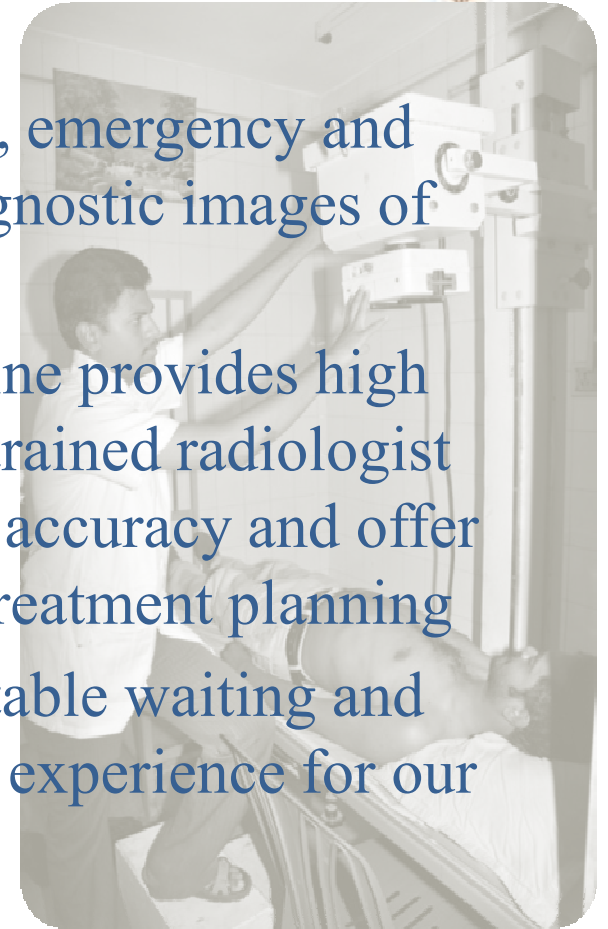

- MedZon provides medical services in all branch of medicine.
- Each department is equipped with latest instruments and trained professionals.
- Patient's well being is our ultimate aim.

# Services - Radiology

- We provided radiology services to inpatient, emergency and out-patient for the purpose of acquiring diagnostic images of the various parts of the body.
- With Digital X-Ray machine, C-Arm machine provides high quality digital images reported by expertly trained radiologist and certified radiology technician to ensure accuracy and offer the best chance for accurate diagnosis and treatment planning
- Our friendly staff provides safe and comfortable waiting and testing environment helps to create positive experience for our patients.

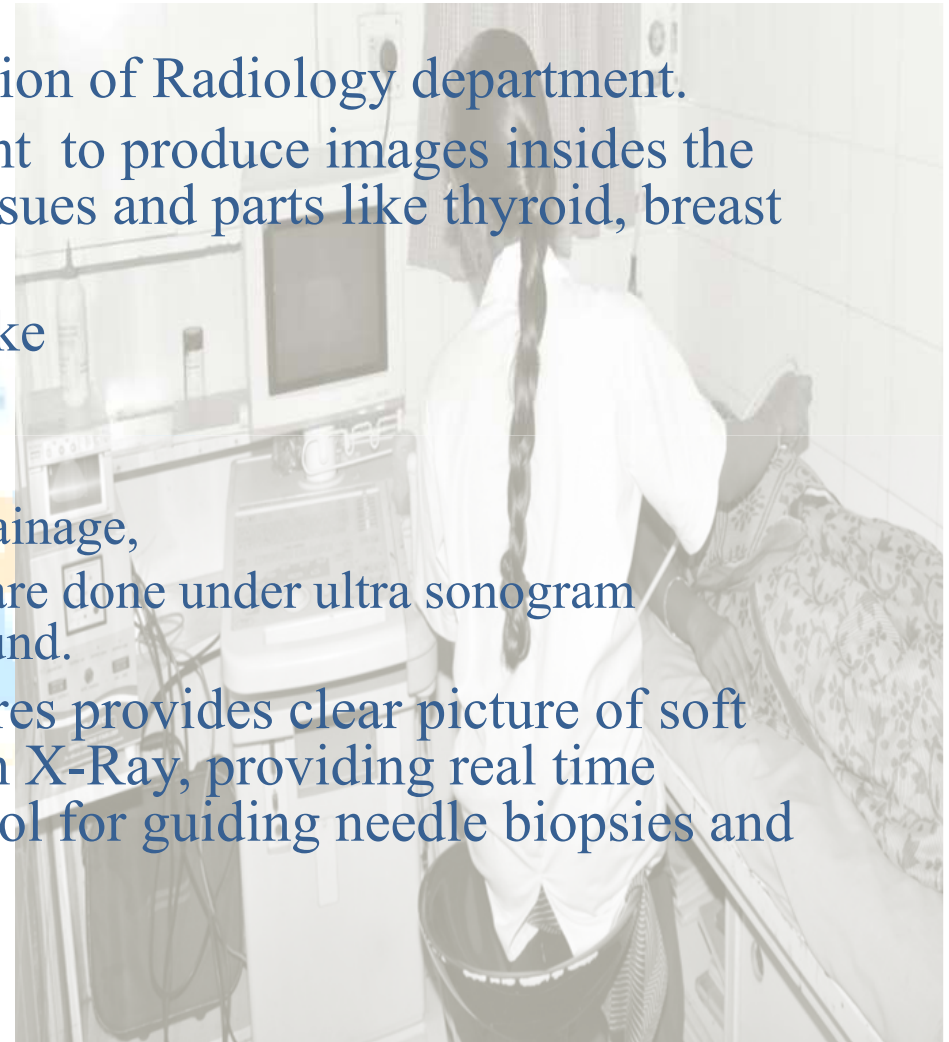

# Services - Ultra sonogram

- Ultrasonography is under the section of Radiology department.
- We have high and latest equipment to produce images inside the body like chest, abdomen, soft tissues and parts like thyroid, breast ultrasound and color Doppler.
- Highly sophisticated procedure like
  - FNAC,
  - Abscess drainage tapping,
  - Percutaneous trans hepatic bile drainage,
  - Percutaneous nephrolithotomy are done under ultra sonogram guidance besides routine ultrasound.
- A non-invasive, painless procedure provides a clear picture of soft tissue that does not show up well on X-Ray, providing real time imaging, which makes it a good tool for guiding needle biopsies and needle aspirations.

# Services - Laboratory

- Clinical laboratory plays an active role in health screenings to our community.
- Our diagnostic services encompasses
  - Phlebotomy,
  - Pathology,
  - Hematology,
  - Urinalysis,
  - Biochemistry,
  - Microbiology,
  - Serology and
  - Immunology.
- We also have agreements with larger reference laboratories for patient with special testing requirements.
- We provides comprehensive round the clock service and equipped with state of art machines with latest computer technology to ensure faster and quality results.
- Additionally, consultant PhD's provide administrative and technical supervision of the laboratory staffs.

# Services - Pharmacy

- Pharmacy is committed to providing first class pharmaceutical service to the patient 24/7 delivering patient-centered, cost effective care for patients at our pharmacy.
- We work closely with physician and nurses to assure that the medications in our hospital are safe and effective.
- Highly skilled pharmacist, pharmacy technician work closely with the patient care team to provide excellent pharmaceutical care.
- Our pharmacist checks & rechecks any prescription so you will always know you're getting exactly what the doctor's order. We also check for possible interaction with other drugs.
- We provide information on the best ways to give medications to minimize the possibilities of drugs (or) food interactions & avoid medication error ensuring patient receive the best product at the best price.

# Services - Physiotherapy

- We have committed and highly experienced and trained physiotherapists. Their wide range of specialist skills enable us to provide the appropriate treatment whether a problem is post traumatic, post surgical, work related or a sporting injury.
- Alongside the in- patient physiotherapy service, we rehabilitate patient through out-patient physiotherapy.
- Our Physiotherapy department provides holistic treatment through physio-led sessions.
- Working in conjunction with the relevant consultant, our aim is to provide a comprehensive assessment and diagnosis of the problem, followed by a course of treatment tailored to the patient's specific needs.
- This may include
  - Manual therapy,
  - Manipulation soft tissue massage,
  - Electrotherapy,
  - Exercise therapy with supervised exercise training in terms of patient needs.
- Following treatment, we work with the patient to design a program of home exercises to ensure continue recovery. We believe in physiotherapy and rehabilitation following injury plays a pivotal role in patient health.
